DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see page 8, filed 9/19/2006, with respect to Claim 6 have been fully considered and are persuasive. The objection of Claim 6 has been withdrawn.
2. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.
4. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bell ('415) in view of Riely ('654).
5. Bell discloses a syringe cap comprising a passage (10), an inlet (2), a port (5) and a filter (75). (See Figure 4) The filter is composed of porous polyethylene. (See Column 2 Lines 57-58) Bell further discloses that said cap is detachably connected to a

syringe (50) comprising a liquid medicine reservoir (not referenced), a pressure device (51) and a tube (53). (See Figure 3 and 4)

6. Bell fails to disclose a liquid absorption member.

7. Riely *et al.* teaches a cylindrical liquid absorption member (34) suited to be placed in a passage. (See Figure 3) Further, the liquid absorption member is taught to be composed of a sponge material or a fiber material. (See Column 3 Line 20-40)

8. It would have been obvious to one of ordinary skill in the art at the time of the invention to modify the disclosure of Bell with the teachings of Riely *et al.* to provide a syringe cap with liquid absorption means comprising a cylindrical liquid absorption member composed of either a sponge or fiber material for to prevent fluid loss.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

11. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
